

Invitation to the workshop

“NavigAbile project”

Tuesday, 12 February 2008
Accenture – Sala Cicerone
Via del Tintoretto, 200 - Roma

NavigAbile is an initiative of Fondazione Italiana Accenture in partnership with Fondazione Don Gnocchi and Fondazione Francesca Rava. It is conducted in collaboration with the Italian Ministero della Solidarietà Sociale. Navigabile aims to provide mainly children and youths affected by different kind of disabilities with an innovative way to communicate and to access web contents.

The project begun with a pilot phase during 2003 and 2004 in Italy, is now starting its European adventure. Disabilities and Augmentative Alternative Communication experts from Italy, Spain, Sweden and Greece joined in a European Commission co-funded project to spread and share NavigAbile tools all over Europe. NavigAbile services have been translated in four languages and educational materials and websites are now available in NavigAbile format in all the involved countries.

On 12th February, during the workshop in Rome, the mid term results about the European market validation of the Project will be presented.
